LD 45

Система для изготовления витражей, окон, дверей и межкомнатных перегородок.

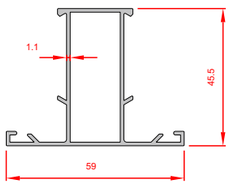

Надежная фурнитура, привлекательный вид, возможность использования в сложных конструкциях, а также доступная цена - все это основные преимущества серии LD 45.

Сегодня это самый популярный вид остекления благодаря своим превосходным качествам. Современные технологии позволяют расширять возможности использования алюминиевого профиля серии LD 45 гораздо более эффективно, чем просто остекление. Простота обработки и легкость соединения профилей между собой позволяют собирать необходимую конструкцию быстро и качественно.
